

AUSTRALIA'S ONLY

5 YEAR FULL REPLACEMENT WARRANTY

ON OUR LEAD ACID FORKLIFT BATTERY RANGE

ARE MANUFACTURERS DENIED BATTERY WARRANTIES COSTING YOU TIME, MONEY AND ULTIMATELY PRODUCT OR COMPANY REPUTATION?

FEATURES:

✓ **ALL INCLUSIVE 5 YEAR FULL REPLACEMENT WARRANTY/ 1500 BATTERY CYCLE**

✓ **WARRANTY BATTERIES PROVIDED AS STANDARD WITH EGOc BATTERY MONITORING**

Our Forklift Batteries are the 'heart' of your Electric Forklift. Trusted, high quality Motive Power products are the key to ensuring long term Electric Forklift usage and performance.

Providing the highest quality Batteries is our top priority. This industry first innovation not only ensures the long-term viability of our Batteries to the Australian Market but also assures our expertise when Industrial Batteries Australia (IBA) are chosen to represent your Electric Forklift products.

We've scrapped the industry standard "Pro Rata" Battery Warranty period, which usually offers very little coverage on the Battery product warranties supplied to the Forklift market, and with most issues typically discounted as "user abuse" in the event of a defective Battery product if reported within the supplied Battery Warranty period.

Our collaboration with global leader and Motive Power ancillary provider Philadelphia Scientific has led to a price inclusive Forklift Battery monitoring package that allows IBA to now cover the full 1500 life cycle warranty period over 5 years.

If our supplied IBA Batteries are maintained and used in accordance with our Manufacturers recommendations, you will be GUARANTEED to have a Forklift Battery that will perform its maximum cycle life expectations with full product warranty coverage.
