

FAST BATTERY CHARGER

OUR FLEXIBLE CHARGER RANGE IS ITALIAN
DESIGNED AND MANUFACTURED, AND CATERS FOR
ANY TYPE OF MATERIALS HANDLING APPLICATION

APPLICATION

- Single shift to **MULTIPLE SHIFT** applications
- Available in Opportunity and Fast charge formats
- Also available in IP54 Weatherproof Enclosure
- Can be supplied in Multi-Voltage output if required
- Will Charge any Battery Chemistry and Voltage

FEATURES:

- Designed for Opportunity Charging at any time of the day
- Fast Charger option (+25-40% Start rate) supplied with Integrated closed loop communication (Battery Management Device - BMODr) fitted to Battery
- Real time clock and time programming enables Battery to Charger communication for complete Battery protection, through precise temperature and voltage control with synced BMODr
- 5 Year Manufacturer's Warranty on Charger
- Extend daily Forklift Battery run times
- Extremely efficient and robust "Hybrid" HF / Transformer design
- Suits multi-shift operations / + 8 Hour daily usage
- Completely programmable to suit any application
- Automatic equalisation and refresh
- Highly efficient charge profile to suit AGM, Gel, Lead Acid and Lithium-Ion Industrial Batteries

BMODr FAST CHARGE CONTROL SYSTEM

Supplied with

FEATURES:

- Synced Communication Device for absolute Battery and Fast Charger control.
- Provides Battery recognition (ID, type, capacity, voltage) and complete Battery and Charger monitoring (Temperature, electrolyte level, equalization) to allow for complete control and protection of the Battery during Fast Charging.
- Works with nominal voltage Batteries from 24 / 36 / 48 / 72 and 80 Volt
- Negates the gassing phase of charge during the day, programmed to charge to a maximum of 80% State of Charge (SOC), and delay full 100% Charge sequence until the end of usage shift - COMPLETELY TIME PROGRAMMABLE TO SUIT ANY SITE
- Once the BMODr is fitted and programmed to the Battery, is non Charger specific, to sync and work with any IBA Smart Fast Charger with the same voltage output.
