

FORKLIFT BATTERY + CHARGER CARE

DO

- Top up Battery ONCE weekly with clean water, always AFTER charging
- Be sure Battery charging is carried out in a well ventilated area
- It is best to charge your Battery at night. This allows suitable cool down period after Charging
- Check Battery and Charger leads and DC plugs regularly
- Keep sparks, flames and other ignition sources away at all times
- Keep your Battery clean and free from dust and debris

DON'T

- Do not opportunity charge the Battery (ie. During daytime breaks) except when using our specialised **"SMART"** and **"FAST"** charger range
- Do not fill Battery with water prior to charging
- Do not remove Battery from the charger without first turning the charger off
- Do not excessively charge your Battery. Optimum Battery charge time is when Battery is at 25% State of Charge
- Do not over-discharge your Battery
- Do not attempt to repair your Forklift Battery - Call an authorised repairer.

LEAD ACID FORKLIFT BATTERIES

Your Forklift Battery is the Heart of your Electric Forklift asset. Proper maintenance and procedures will ensure many years of trouble free usage and also maximise battery life expectancy !
